

## STRONG ACID CATION EXCHANGE RESIN

Model: INK-100

### Description

Model: INK-100 is a sort of cation exchange resin that has sulfonic group ( $-SO_3H$ ) in the styrene-diethylene benzene copolymer with 7% cross-linked degree. It is used mainly to soft hard water and produce pure water, as well as used in the hydro-metallurgy and sugar producing and medicine and no sodium glutamate industry, it can be used as catalyzer and dehydrating agent.

### Features

-  **High Ion Exchange Capacity**  
Effectively reduces water hardness and purifies water with high efficiency.
-  **Stable Physical and Chemical Properties**  
Maintains stability under various operating conditions, ensuring long-term performance.
-  **Versatile Industrial Applications**  
Suitable for multiple industries, including sugar refining, pharmaceuticals, and hydrometallurgy.
-  **Uniform Particle Size**  
Consistent resin bead size ensures efficient water flow and minimal pressure drop.
-  **Chemically Safe Composition**  
Designed with materials suitable for water treatment and industrial applications.

### Applications

-  Water Softening and Pure Water Preparation
-  Hydrometallurgy
-  Sugar Refining
-  Pharmaceuticals
-  Glutamic Acid Preparation
-  Dehydrating Agent
-  Catalysts

## HYDRAULIC PROPERTIES

### PRESSURE DROP

The graph above shows expected pressure loss per foot of bed depth as a function of flow rate, at various temperatures.

### BACKWASH

After each cycle the resin bed should be backwashed at a rate that expands the bed 25 to 50 percent. This will remove any foreign matter and reclassify the bed. The graph below shows the expansion characteristics of INK-100 in the sodium form.

## Typical Physical and Chemical Properties:

ITEMS	DATA
Appearance	Palm Yellow to burnt brown spherical grain
Ionic Form	Na <sup>+</sup>
Moisture Content (%)	45 ~ 50
Total Exchange Capacity (mmol/g)	≥ 4.5
Total Exchange Capacity (mmol/ml)	≥ 1.9
Shipping Weight (g/ml)	0.77 ~ 0.87
True Density (g/ml)	1.250 ~ 1.290
Particle Size Range (%)	(0.315mm ~ 1.250mm) ≥ 95.0
Effective Size (mm)	0.400 ~ 0.700
Uniformity Coefficient	≤ 1.60
Sphericity After Attrition (%)	≥ 90
